LIKITHA MAGHAM

Data Analyst
EMAIL ID: Likitham4968@gmail.com | PHONE NO: 616-900-4968

PROFESSIONAL SUMMARY

Data Analyst with 4+ years of experience in data analytics, business intelligence, and reporting automation across retail and IT services operations. Strong SQL, Python, Power BI, and Excel skills, with hands-on experience in ETL and data transformation, data integration, exploratory data analysis, KPI definition, and dashboard reporting. Experienced in querying and analyzing large datasets, automating recurring reports, and building data validation and quality checks that reduce rework and improve reporting accuracy. Works directly with finance, operations, and business stakeholders to turn reporting requirements into dashboards and insights that support operational decisions.

WORK HISTORY

Apr 2025 – Present
Data Analyst
Meijer – Grand Rapids, MI

- Develop and maintain **4 Power BI dashboards** using DAX, Power Query, and data modeling to track operational performance, process volume, and KPIs, providing weekly reporting visibility to **25 stakeholders** across finance and operations.
- Automate **6 recurring reports and data workflows** using Power Automate, UiPath, and Power BI, reducing manual effort by **10 hours per week** and improving reporting consistency.
- Write SQL queries against Snowflake to extract, join, and aggregate datasets containing **1M+ rows**, supporting operational trend analysis, volume reporting, and process-flow analysis.
- Build data preparation workflows in **Python and Pandas** to clean, transform, and profile datasets, flagging missing values and duplicate records before analysis and reporting.
- Apply SQL, Python, and Power Query transformations to integrate source data into structured, report-ready datasets for recurring and ad hoc analysis.
- Perform exploratory data analysis in **Python and NumPy**, creating visualizations with **Matplotlib and Seaborn** to examine operational metrics, identify trends, and uncover patterns.
- Implement data validation checks and investigate recurring data quality issues, reducing report rework and improving data reliability for finance reporting.
- Partner with finance and operations stakeholders to gather requirements, define KPIs, validate report output, and deliver reporting that supports business decisions.
- **Environment**: SQL, Snowflake, Python, Pandas, NumPy, Power BI, DAX, Power Query, Power Automate, UiPath, Matplotlib, Seaborn

May 2020 – Dec 2023
Data & Business Analyst
Mphasis – Bangalore, India

- Developed **10 interactive Power BI dashboards** to track operational performance and business KPIs, providing **40 stakeholders** with self-service reporting and reducing ad hoc reporting requests.
- Wrote SQL queries using joins, aggregations, and common table expressions (CTEs) to retrieve, combine, and analyze structured datasets for business and operational reporting.
- Integrated data from **4 sources** using SQL and Power Query to create structured reporting datasets, improving data accessibility and reducing report preparation time by **30%**.
- Automated recurring Excel reports using PivotTables, Power Query, and advanced Excel formulas, saving the team **6 hours per week** and improving reporting consistency.
- Scripted Excel data processing in **Python and OpenPyXL** to manipulate workbooks and prepare data for recurring reports.

- Retrieved data from REST APIs using Python Requests, processed JSON responses, and prepared the output for downstream analysis and reporting.
- Performed exploratory data analysis in Python with Pandas and NumPy, visualizing results in Matplotlib and Seaborn to identify trends, patterns, and business insights.
- Gathered and documented business requirements, defined **15 KPIs** with stakeholders, and supported user acceptance testing (UAT) to validate reporting solutions against business needs.
- **Environment**: SQL, Python, Pandas, NumPy, OpenPyXL, REST APIs, Requests, JSON, Power BI, DAX, Power Query, Excel, Matplotlib, Seaborn

EDUCATION

- **Master of Science in Computer Science |** Grand Valley State University | Allendale, MI | August 2025

- **Bachelor of Science in Computer Science |** Sathyabama University | Chennai, India | 2021

Technical Skills

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy
- **Business Intelligence & Visualization:** Power BI, DAX, Power Query, Data Modeling, Tableau, Matplotlib, Seaborn
- **Databases & Data Platforms:** SQL Server, PostgreSQL, Snowflake, Databricks, Microsoft Fabric, OneLake
- **Data Preparation & Quality:** ETL, Data Cleaning, Data Transformation, Data Integration, Data Validation, Data Quality
- **Automation & Reporting:** Excel (PivotTables, Advanced Formulas), Power Automate, UiPath, OpenPyXL
- **APIs & Data Exchange:** REST APIs, Python Requests, JSON
- **Business Analysis & Delivery:** Requirements Gathering, KPI Definition, UAT, Jira, Confluence, Visio

ACADEMIC & INDEPENDENT PROJECTS

Supply Chain Reporting & Dashboarding

Technologies: SQL, Power BI, Excel

Built a set of Power BI dashboards to monitor inventory movement, order volumes, delivery delays, and distribution performance, giving a single view of supply chain health.

Queried and analyzed historical and near-real-time order data using SQL to identify delivery delay patterns, examine operational trends, and support supply chain planning.

Compiled operational metrics into structured Excel reports used to compare performance across periods and flag potential bottlenecks.

Business Intelligence Reporting System

Technologies: Power BI, SQL, Excel

Built an end-to-end BI reporting solution in Power BI, covering source data preparation, the reporting model, and the final KPI views.

Consolidated data from multiple datasets into a unified reporting model, improving consistency across reports and providing stakeholders with a more centralized view of business metrics.

Collaborated with business users to gather requirements, define reporting metrics, and refine dashboard functionality to align with business needs and improve reporting usability.
